Subject: Nuclear Waste

June 9, 2003 (11:47AM)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Sirs:

I understand that you want to change the rules on how nuclear waste is disposed of by allowing more waste to be mixed in consumer products. This quick fix will lead to future health problems. Look at what is happening because of our use of depleted uranium in two Middle East wars. Instead:

- * Focus the rulemaking on better ISOLATING nuclear waste from the public and the environment rather than dispersing deliberately;
- * PROHIBIT RELEASE of radioactive wastes and materials from nuclear power and weapons into the marketplace for unrestricted or conditional uses;
- * Prevent additional radiation exposures rather than "justifying" them with computer codes and dose modeling created by nuclear advocates. We oppose "dose-based" or "risk-based" standards.
- * Since there is no safe dose of ionizing radiation, we accept NO dose above naturally occurring background and voluntary exposures for our own personal benefit.
- * Stop poisoning us and the recycling industries with ANY level of radioactive contamination from nuclear power and weapons fuel chain activities.

Yours truly,
Greg Woz
