Subject: COMMENT ON RULES FOR THE USES and DISPOSITION of NUCLEAR WASTE

DOCKET NUMBER
PROPOSED RULE PR 20
(68FR09595)

(139)

Along with the NIRS, I strongly urge you to focus rulemaking on:

- * Better ISOLATING nuclear waste from the public and the environment rather than dispersing deliberately;
- * PROHIBIT RELEASE of radioactive wastes and materials from nuclear power and weapons into the marketplace for unrestricted or conditional uses;
- * Prevent additional radiation exposures rather than "justifying" them with computer codes and dose modeling created by nuclear advocates. We oppose "dose-based" or "risk-based" standards.
- * Since there is no safe dose of ionizing radiation, NO dose is acceptable above naturally occurring background and voluntary exposures for our own personal benefit.
- * Stop poisoning us and the recycling industries with ANY level of radioactive contamination from nuclear power and weapons fuel chain activities.
