

DOCKET NUMBER
PROPOSED RULE 20
(68FR 09595)

June 9, 2003 (12:33PM)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Dear Rulemaking and Adjudicating Staff:

167

I am concerned about reports that the NRC is going to, or may allow use of recycled radioactivity in household objects. There ~~are too~~ is too much exposure to radioactivity in our society already. Please do not allow any more. Please restrict the NRC's proposed rulemaking to those regulatory options that strictly prohibit the deregulation of any materials with detectable ~~radiation~~ radioactivity. Such materials should be disposed of only in secure, licensed facilities that are designed to isolate ~~such~~ such radioactive waste from humans and the environment.

Sincerely,
Katharine Tussing
