Framatome ANP, Richland, Inc.
2101 Horn Rapids Road
Richland, WA 99352

SUBJECT: FRAMATOME ANP REQUEST FOR WITHHOLDING INFORMATION FROM
PUBLIC DISCLOSURE FOR NORTH ANNA POWER STATION, UNIT 2
(TAC NO. MB7515)

Dear Mr. Mallay:

By letter dated May 12, 2003, Virginia Electric and Power Company submitted an affidavit dated April 25, 2003, executed by you, requesting that information contained in the document entitled "RVH Drawings CMP-020 Examination of Reactor Pressure Vessel Head-to-Flange Weld," be withheld from public disclosure pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR) Section 2.790. A nonproprietary copy of this document has been placed in the Nuclear Regulatory Commission's (NRC's) Public Document Room and added to the Agencywide Documents Access and Management System Public Electronic Reading Room.

The affidavit stated that the submitted information should be considered exempt from mandatory public disclosure for the following reasons:

- (a) The information sought to be withheld from public disclosure is of the type customarily held in confidence by Framatome ANP (FANP) and is not made available to the public.
- (b) The information has been made available to the NRC in confidence.
- (c) The information reveals details of FANP's research and development plans and programs or their results.
- (d) Use of the information by a competitor would permit the competitor to significantly reduce its expenditures, in time or resources, to design, produce, or market a similar product or service.
- (e) The information includes test data or analytical techniques concerning a process, methodology, or component, the application of which results in a competitive advantage for FANP.
- (f) The information reveals certain distinguishing aspects of a process, methodology, or component, the exclusive use of which provides a competitive advantage for FANP in product optimization or marketability.

- (g) The information is vital to a competitive advantage held by FANP, would be helpful to competitors of FANP, and would likely cause substantial harm to the competitive position of FANP.

We have reviewed your application and the material in accordance with the requirements of 10 CFR 2.790 and, on the basis of your statements, have determined that the submitted information sought to be withheld contains proprietary commercial information and should be withheld from public disclosure.

Therefore, the version(s) of the submitted information marked as proprietary will be withheld from public disclosure pursuant to 10 CFR 2.790(b)(5) and Section 103(b) of the Atomic Energy Act of 1954, as amended.

Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the documents. If the need arises, we may send copies of this information to our consultants working in this area. We will, of course, ensure that the consultants have signed the appropriate agreements for handling proprietary information.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the NRC. You also should understand that the NRC may have cause to review this determination in the future, for example, if the scope of a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified in advance of any public disclosure.

If you have any questions regarding this matter, I can be reached at 301-415-1544.

Sincerely,

/RA/

Stephen R. Monarque, Project Manager, Section 1
Project Directorate II
