Attn: Rulemaking & Adjudications Staff

I am opposed to the NRC
proposed rulemaking as described
in the Federal Register, 4-16-01, V. 66
to change the licensing hearing process
for nuclear power reactors. The
public is entitled to full and
meaningful participation in an
on-the-record hearing process for
the licensing (+ relicensing!) of
new (uprated) reactors and
industry amendments to operating
license safety requirements.
