Subject: Radioactive Waste

Dear NRC:

I want NO radioactive waste whatsoever in consumer products or infrastructure. The NRC should be isolating the public from radioactive waste, not marketing it. Of five options listed, the only acceptable one is to send radioactive waste to licensed nuclear waste facilities.

I would also like you to track and identify the radioactive waste already deregulated and put into general circulation, in view of the claim that it has had no effect on civilian health.

Additionally, radioactive products or wastes should not be sent to any other country.
