

June 30, 2003

Mr. George A. Oldziewski, President
OGG Corporation
3150 South Arville Street, #47
Las Vegas, NV 89102

Dear Mr. Oldziewski:

I am responding to your letter to President George W. Bush, dated April 21, 2003, seeking a grant or other funding for the development, construction, and prototype testing of your ZEUS Cytostat device. Your letter was forwarded to me for a response because you described it as a "miniature, portable, nuclear irradiator." As you may be aware, irradiators are licensed by the U.S. Nuclear Regulatory Commission (NRC) in accordance with the applicable safety and security requirements.

Please note that the NRC's mission is to regulate the Nation's civilian use of byproduct, source, and special nuclear materials to ensure adequate protection of public health and safety, to promote the common defense and security, and to protect the environment. We regulate the civilian use of nuclear materials by rulemaking, licensing, inspection and enforcement of the regulatory requirements. Because of its mission, the NRC is not in a position to provide grants or other forms of funding for the development of commercial products. Therefore, the NRC is unable to grant your request.

You may wish to visit the NRC web site: www.nrc.gov. The web site delineates the NRC's mission, functions, and the applicable regulations (e.g., 10CFR Parts 30, 32 and 36) for your device. If you need further information regarding your request, please contact Mr. Thomas H. Essig, Chief, Materials Safety and Inspection Branch, by e-mail at the@nrc.gov or by telephone at (301) 415-7231.

Sincerely,

/RA/

Martin J. Virgilio, Director
Office of Nuclear Material Safety
and Safeguards
