Subject: Stop nuclear waste recycling

(1004)

You have requested comments concerning the control of nuclear waste of various kinds.

I am very concerned to hear there is a possibility that nuclear wastes could be recycled, reused, or otherwise allowed (in any form) to come into contact with our people, our air, our soil, or our environment.

Experience with nuclear waste and byproducts have shown that they are unspeakably dangerous! Please do not relax standards or allow nuclear wastes to be recycled or re-used at all!

Sincerely,
Ruth Hultman
