

**DOCKET NUMBER
PROPOSED RULE PR 20****68FR09595**

From: "Chad Burris" <chadburris@boxtalent.com>
To: <secy@nrc.gov>
Date: Mon, Jun 23, 2003 11:29 PM
Subject: nuclear dumping

1006

i have become aware that the NRC is preparing to soften the rules regarding nuclear dumping and recycling. i have been informed that this will lead to hazardous and unwanted results. i would kindly ask, if not beg, that you please reconsider this move. the dumping of waste poses serious problems to the environment. recycling of the waste will only serve to redistribute the hazardous materials into other objects that affect our everyday lives, thus posing a direct threat to the health of any person who may come into contact with that object. surely there exists a viable, less disastrous option to disposing of the waste. i do not believe the importance of our planet and the health of it's inhabitants can be overstated. please regard these issues as the time for a decision draws near.

**DOCKETED
USNRC****June 24, 2003 (9:02AM)****OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF**

respectfully,

chad burris
