Charleston, West Virginia 25305-0300

**SUBJECT: REQUEST FOR COMMENTS REGARDING CULTURAL AND HISTORICAL  
RESOURCES AT A SITE IN LEWISBURG, WEST VIRGINIA**

Dear Ms. Herholdt:

The U. S. Nuclear Regulatory Commission (NRC) is requesting comments from the State Historic Preservation Officer regarding any impacts to cultural and historic resources at a location of the West Virginia School of Osteopathic Medicine in Lewisburg, West Virginia.

By letter dated June 6, 2003, the West Virginia School of Osteopathic Medicine submitted a request to terminate their materials license. License No. 47-19315-01 was issued on June 6, 1980, and amended periodically since that time. The licensee was authorized to use carbon-14, sulfur-35, phosphorus-32, iodine-125 and tritium for laboratory research including in vitro studies. The use of licensed materials was limited to laboratory benches and fume hoods. No outdoor areas were affected by the use of licensed materials. The licensee has performed a close out survey demonstrating that there is no residual radioactivity. The NRC will perform a confirmatory survey prior to amending the license.

Following review of all pertinent information, we feel that terminating the West Virginia School of Osteopathic Medicine materials license will have no impact on the historic or cultural environment and request your concurrence.

In accordance with 10 CFR 2.790 of NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in NRC's Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Ms. Nancy Herholdt
