**SUBJECT:** Indian Point Nuclear Generating Unit No.3  
Docket No. 50-286  
**Proposed Changes to Technical Specifications:**  
**Pressure-Temperature and Overpressure Protection**  
**System Limits for Up To 20 Effective Full Power Years**

**REFERENCE:** (1) Entergy letter to NRC, NL-03-093, "Proposed Changes to Technical Specifications: Pressure-Temperature and Overpressure Protection System Limits for Up To 20 Effective Full Power Years", dated May 28, 2003.

Dear Sir:

Reference (1) submitted to the NRC proposed changes to the Indian Point Unit No. 3 Technical Specifications regarding Pressure-Temperature and Overpressure Protection System (OPS) Limits. During the Entergy Nuclear Operations, Inc. review process it was decided to retain the current Overpressure Protection System enable temperature, which necessitated other changes to the proposed submittal. The changes were correctly incorporated into Attachments I and II of Reference (1). Due to an administrative oversight the first sentence of the second paragraph of the cover letter was not changed to reflect the retention of the OPS enable temperature. Therefore, this letter supplements Reference (1) and the following sentence replaces the first sentence of the second paragraph of the Reference (1) cover letter:

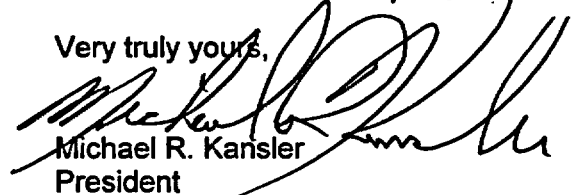

"This amendment request seeks to revise Figure 3.4.3-1; Figure 3.4.3-2; Figure 3.4.3-3; Figure 3.4.12-1; Figure 3.4.12-2; Figure 3.4.12-3 and Figure 3.4.12-4 of the Indian Point 3 Technical Specifications."

A001

There are no new commitments identified in this letter. If you have any questions, please contact Ms. Charlene Faison at 914-272-3378.

I declare under penalty of perjury that the foregoing is true and correct. Executed on 06/24/03.

Very truly yours,

Michael R. Kansler  
President  
Entergy Nuclear Operations, Inc.
