Re: United States Nuclear Regulatory Commission (NRC) on  
Rulemaking on Controlling the Disposition of Solid Materials  
(Radioactive Waste and Materials Release, Recycling, Dispersal)  
Scoping Process for Environmental Issues  
Federal Register: Feb. 28, 2003 Vol. 68 No. 40 Pp. 9595-9602

DOCKETED  
USNRC

June 26, 2003 (11:12AM)

OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

Honorable Secretary:

I am requesting you as Secretary specifically, and the Nuclear Regulatory Commission in general, to recapture the radioactive wastes that already have been released. Since the claim is made that these releases have had no effect, I ask you and your Commission to prove it by identifying where the nuclear wastes have gone and checking to see what effects there have been.

It is your sworn duty to protect all of the citizens and the environment of the United States from any adverse effects from nuclear materials and nuclear wastes. You have been entrusted with the protection from nuclear hazards of not only the current population of the United States, but, because of the nature of radioactivity, you are also charged with the protection of generations to come. Please propose and implement rules that follow the intent and spirit of your duties.

Take good care.

Respectfully,

Jean M. Bromert  
2036 352nd Place  
Earlham, IA
