

**DOCKET NUMBER  
PROPOSED RULE PR 20****68FR09595**

**From:** "Suzanne Seppi" <s.seppi@worldnet.att.net>  
**To:** <secy@nrc.gov>  
**Date:** Thu, Jun 26, 2003 1:08 PM  
**Subject:** nuclear materials reuse

1769

I urge you not to release and recycle the nuclear industries' materials and wastes into the "free market" for reuse in consumer products, roadbeds, contaminated soils and sludge that could be spread on agricultural fields through the "scoping" proposal for "Controlling the Disposition of Solid Materials". You can not imagine that the American Public wants such a thing regardless of the lower radiation content. You can not know what additive effects there might be in an individual's life through use or location near to this material added to other exposures. It would be entirely inappropriate to do such a thing wherein the public would not know that radiation was a part of their products possibly on their person each day etc. Sue Seppi (Director Group Against Smog and Pollution)

**DOCKETED  
USNRC**
