**Subject:** Nuclear Waste in the Marketplace

1878

To Whom It May Concern,

After being alerted to the fact that the NRC is considering issuing a new rule allowing some radioactive materials to be treated as if they weren't radioactive, I wanted to contact you to voice my concerns. (I sent this accidentally before I was finished...sorry.)

In regards to the issue, I hope it gets reconsidered. The chances of citizens being exposed to these hazardous radioactive wastes is definitely too much of a risk. We are already exposed to more than enough pollution/contamination as it is. We breathe, drink & eat our environment & the thought of folks being exposed to additional tainted materials is a scary thought!!

The negative repercussions of allowing this type of thing to happen will be felt for generations to come. Please reconsider this issue...for the kid's sakes!

Thank you for your time.

Peace,

Sharon Root  
503 Carlson St.  
Marshall, MN 56258
