**Subject:** nuclear waste

People are not waste dumps. Do not dump nuclear waste on us. No nuclear waste in any item that would be used in any way by any human or animal.

To believe that it is safe to put nuclear radioactive materials in any item for public consumption is to show that those spewing this idea have no idea what the meaning of tactile radioactivity is to the public. That is, unless they want to end the human race in a most devastating way.

Remember Chernobyl. Children are still suffering with cancers from that tragedy. Can you seriously believe radioactive items are safe???
