Subject: No Nuclear Materials In The Market Place Please!

1882

Hello, my name is Jill Pedersen and I am a concerned citizen.
It has come to my attention that making nuclear waste available for
'recycling' into consumer products on the market place is again being tossed
around as a "good" idea. Simply put, NOTHING could be farther from the
truth.

I urge you to STOP this insanity and hear the voices of your concerned
citizens around you. We are alarmed. We do not want this.

You must do everything in your power to see that this does not take place.

Thank you for your time and attention to this matter,

Sincerely,
Jill M. Pedersen
