**NEW JERSEY POLLUTANT DISCHARGE ELIMINATION SYSTEM
DISCHARGE MONITORING REPORT
HOPE CREEK GENERATING STATION
NJPDES PERMIT NJ0025411**

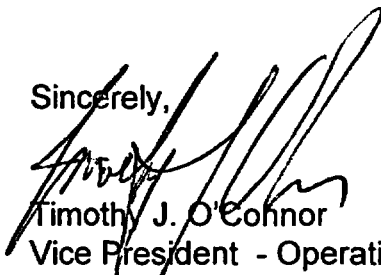

Dear Sir:

Attached is the Discharge Monitoring Report for the Hope Creek Generating Station for the month of May 2003.

This report is required by and prepared specifically for the Environmental Protection Agency (EPA) and the New Jersey Department of Environmental Protection (NJDEP). It presents only the observed results of measurements and analyses required to be performed by the above agencies. The choice of the measurement devices and analytical methods are controlled by the EPA and the NJDEP, not by the company, and there are limitations on the accuracy of such measurement devices and analytical techniques even when used and maintained as required. Accordingly, this report is not intended as an assertion that any instrument has measured, or that any reading or analytical result represents the true value with absolute accuracy, nor is it an endorsement of the suitability of any analytical or measurement procedure.

If you have any questions concerning this report, please feel free to contact J. Serfass at (856) 339-5411.

Sincerely,

Timothy J. O'Connor
Vice President - Operations

EXPLANATION OF CONDITIONS

May 2003

The following explanations are included to clarify possible deviation from permit conditions.

General - The columns labeled "No. Ex" on the enclosed DMR tabulate the number of daily discharge values outside the indicated limits.

Data reporting and accuracy reflect the working environment, the design capabilities and reliability of the monitoring instruments and operating equipment.

Deviations from required sampling, analysis monitoring and reporting methods and periodicities are noted on the respective transmittal sheet.

Results reported on the Discharge Monitoring Report forms are consistent with permit limits, data supplied from contract laboratories, the December 1993 revision of the NJDEP DMR Instruction Manual and specific guidance from DEP personnel.

NJPDES PERMIT: NJ0025411

MONITORING PERIOD: 5/1/2003 to 5/31/2003

MONITORED LOCATION: 461C – DSN 461C – DSW internal

MONITORING REPORT COMMENTS:

Sample frequency is twice per month for petroleum hydrocarbons. The samples are split and sent to two different laboratories for analysis. For the first set of samples (5/06/2003), one of the labs exceeded the hold time and the result of that analysis was therefore not used. A third sample was obtained on 5/21/2003 and sent to this lab only for analysis. For the second set of samples (5/13/2003), one of the labs performed the wrong analysis on the sample, so again only one result from the split was available. The monthly average reported represents the average of the three samples obtained in the aforementioned manner, and the maximum is the highest of the three results.
