

**DOCKET NUMBER
PROPOSED RULE PR 20****68FR09595**

From: Gretel Smith <shmerg2@yahoo.com>
To: <secy@nrc.gov>
Date: Mon, Jun 30, 2003 8:03 PM
Subject: Controlling the Disposition of Solid Materials

2605

To whom this may concern:

The Roman Empire fell due in part to Lead Poisoning.
By selling or giving away Waste from Nuclear sites you
are in a sense doing the same thing.

Does the NRC truly want to be liable for millions of
people being exposed to excessive radiation thus
causing higher cancer rates and in return MURDERING
inocent men, Women and Children?

Please say no to your "Controlling of the Disposition
of Solid Materials."

Thank you,
Gretel Smith
San Diego, CA
