

DOCKET NUMBER
PROPOSED RULE PR 20

Subject: Regulate Nuclear Waste

2399

To Whom it may concern,

I am not in favor of continued loosening of control on materials deemed "below regulatory concern". Regather those of these materials already loosed into our marketplace and determine whether they have in fact been harmless. Begin to make visible the actual costs of the nuclear power and weapons industry, that was provided monstrous subsidies to be created, that was allowed incredible exemptions from the damage they are likely to do and now threatening to loose their waste into our midst to cause disease for countless generations.

Sincerely,

Michael Gardos Reid
