

DOCKET NUMBER

PROPOSED RULE PR 20

68FR09595

From: Traci Confer <tconfer@envirolink.org>
To: <secy@nrc.gov>
Date: Mon, Jun 30, 2003 4:05 PM
Subject: comment on Disposition of Solid Materials

(2485)

Re: Rulemaking on Controlling the Disposition of Solid Materials Scoping
Process for Environmental Issues
Federal Register: Feb. 28, 2003 Vol. 68 No. 40 Pp. 9595-9602

Dear NRC,

My comments are as follows...

There is more than enough unavoidable radioactive exposure in this world.
What kind of an idiot would add to it?

Radioactive material should be isolated. Under no circumstances should
human-created radioactivity be released. Isolating it from the biosphere
is the only responsible thing to do. No, wait, there is one additional
responsible thing to do with radioactive waste: stop making more!

Thank you,

Traci Confer
1434 Elbridge St
Philadelphia PA 19149
