

**DOCKET NUMBER
PROPOSED RULE PR 20****68FR09595**

From: "Nicola Coddington" <nscod@earthlink.net>
To: <secy@nrc.gov>
Date: Mon, Jun 30, 2003 3:57 PM
Subject: Absolutely NO radioactive "recycling"

2490

RE: Public Comment Period on rule changes on releasing radioactive wastes

MY STRONG OPINION IS: Not only should you not allow ANY release or reuse of ANY even partially radioactive waste, you should be tracking what you have already allowed to be released to see what harm it has caused. I was absolutely shocked and outraged to hear that some has already been allowed to be used in common household products. As if there weren't already enough environmental and toxic hazards to our children's DNA!!!!
And don't allow the nuclear waste producers to talk you into any reduced regulatory control. Protect the American people, not big business.

Nicola Coddington
