OFFICE OF SECRETARY  
RULEMAKINGS AND  
ADJUDICATIONS STAFF

"Rulemaking on Controlling the Disposition of Solid Materials"  
(Radioactive Waste and Materials Release, 'Recycling,' Dispersal)  
Scoping Process for Environmental Issues

Federal Register: Feb. 28, 2003 Vol. 68 No. 40 Pp. 9595-9602

Please choose option 5: Radioactive waste should be stored, managed and isolated from the environment for as long as it is hazardous at facilities specifically licensed for that purpose for radioactive waste. Existing regulations (10CFR 61) for nuclear waste disposal should be strengthened. NRC should use this rulemaking to truly devise ways to control radioactive waste, not release it from licensed control. Mike Taylor 1271 St. Albans St NSt. Paul, MN 55117
