Mr. David B. Fogle
Advanced Technology Licensing Program
Division of Licensing, Registration & Standards
Bureau of Radiation Control
Texas Department of Health
1100 West 49th Street
Austin, TX 78756

Dear Mr. Fogle:

Your participation has been requested to act as a team member on the Washington Integrated Materials Performance Evaluation Program (IMPEP) review. The Washington IMPEP review has been scheduled for September 8-12, 2003 in Olympia, Washington.

You have been assigned lead reviewer for the common performance indicator, Sealed Source and Device Evaluation Program. It is important that you review the results of the previous IMPEP and the IMPEP criteria for your assigned indicator prior to the review. The "IMPEP Toolbox" at the NRC Office of State and Tribal Programs website (www.hsrdoornl.gov/nrc/home.html) contains additional information you may find useful.

If you have any questions regarding this review, please contact Duncan White at 610-337-5042. If you have any questions about the IMPEP process in general, please contact me at (301)-415-2589. I appreciate your assistance with the upcoming review.

Sincerely,

/RA/

Lance J. Rakovan
IMPEP Project Manager
Office of State and Tribal Programs

David B. Fogle
