Pittsburgh, PA 15230-0355

SUBJECT: ACCEPTANCE OF WCAP-15872, REV. 00, "USE OF ALTERNATE DECAY
HEAT REMOVAL IN MODE 6 REFUELING" (TAC NO. MB9020)

Dear Mr. Bischoff:

By letter dated March 31, 2003, the Combustion Engineering Owners Group (CEOG) submitted for NRC staff review Topical Report (TR) WCAP-15872, Rev. 00, "Use of Alternate Decay Heat Removal in Mode 6 Refueling." It also requested, consistent with the NRC Office of Nuclear Reactor Regulation Instruction LIC-500, "Processing Requests for Reviews of Topical Reports," that the NRC provide an estimate of the review hours, as well as target dates for any requests for additional information (RAIs) and for completion of the safety evaluation (SE) for the TR.

The NRC staff has performed an acceptance review of WCAP-15872, Rev. 00. We have found that the material presented is complete enough to begin a review. The staff expects to issue RAIs by August 15, 2003, and complete its review by February 28, 2004. It is estimated that the review will require approximately 300 staff hours.

Section 170.21 of Title 10 of the *Code of Federal Regulations* requires that TRs are subject to fees based on the full cost of the review. You did not request a fee waiver; therefore, staff hours will be billed accordingly. To enable us to complete this review on schedule, close and frequent communications between our technical staffs will be required.

Sincerely,

/RA/

Drew Holland, Project Manager, Section 2
Project Directorate IV
Division of Licensing Project Management
Office of Nuclear Reactor Regulation
