Dr. Niles J. Diaz, Chairman
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Chairman Diaz:

We have been contacted by residents of Milford Township in Bucks County, Pennsylvania regarding the licensing application of CFC Logistics/Gray*Star, Inc. relating to their proposed Cobalt-60 nuclear food irradiation plant.

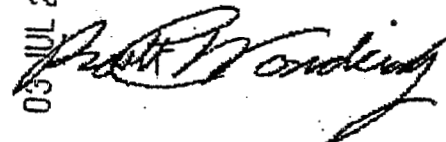

Residents have many questions and concerns about the proposed nuclear irradiation facility being located in their community. It is our understanding that your offices have received and are reviewing their request for a hearing on this matter. We believe it is important to allow the affected community's citizens to express themselves and be given the fullest possible disclosure of the facts about such a plant and measures being taken to assure their safety. We urge you to provide this community with the opportunity to present its concerns prior to issuing a license in this matter.

It is our hope that the NRC make every effort to consider these concerns in reviewing this licensing application and the related request for a hearing. Thank you for your prompt attention to this important matter.

Sincerely,

Arlen Specter
U.S. Senate

July 30, 2003

SECRETARY

The Honorable Arlen Specter
United States Senate
Washington, DC 20510

Dear Senator Specter:

This letter responds to your letter dated July 18, 2003, to Chairman Nils J. Diaz regarding the application by CFC Logistics, Inc., for a Nuclear Regulatory Commission (NRC) materials license to operate a cobalt-60 irradiator in Milford Township, Bucks County, Pennsylvania.

As you noted in your letter, a group of Milford Township residents has submitted a hearing request on that license application to the NRC. That request was filed on June 23, 2003, by counsel for Concerned Citizens of Milford Township. In accordance with NRC's procedures in 10 C.F.R. Part 2, Subpart L, the Chairman of the NRC Atomic Safety Licensing Board Panel has appointed a Presiding Officer to review the request for a hearing.

Under NRC rules, the Commission has an appellate role in all proceedings before its Atomic Safety and Licensing Boards or presiding officers. Because of that role, I trust that you will understand that the Commissioners must remain impartial during the pendency of a case, whether it is before a presiding officer or on appeal to the Commission. Therefore, it would be inappropriate for either Chairman Diaz or the other Commissioners to discuss or comment on any aspects of the proceeding now pending before the presiding officer.

However, the NRC staff in the first instance, is responsible for evaluating CFC's application for a license. The Commission has forwarded your letter to the staff for a separate response to you. In addition, we are placing your letter and this response in the docket file of the proceeding and providing it to all the parties.

Please feel free to contact me at 301-415-1969 if you have additional questions regarding this matter.

Sincerely,

Annette L. Vietti-Cook
