SUBJECT: REQUALIFICATION PROGRAM INSPECTION - MILLSTONE NUCLEAR
GENERATING STATION UNIT 3

Dear Mr. Christian:

In a telephone conversation on August 12, 2003, Mr. Alan Blamey, Senior Examiner/Inspector, and Mr. Tim Kulterman, Supervisor, Unit 3 Licensed Operator Requalification, made arrangements for the NRC to inspect the licensed operator requalification program at the Millstone facility. The inspection is planned for the week of September 22, 2003, which coincides with your regularly scheduled requalification examination cycle. The staff at your facility should prepare and conduct the requalification examinations in accordance with your NRC-approved requalification program.

In accordance with 10 CFR 55.59(c), the NRC may request facility licensees to submit their annual operating tests as necessary to support the NRC's inspection program needs. In order for the NRC to adequately prepare for this inspection, please furnish the examination schedule, sample plan, and operating tests scheduled for the week of the inspection to the NRC by September 15, 2003. Mr. Kultermen has been advised of this request and provided with the name and address of the NRC lead inspector assigned to this inspection.
