My name is Lorraine Cotter and I live in Pennsylvania where there are several Nuclear Reactors. If you place a map of cancer clusters in the US on top of a map of where Nuclear Reactors are in the US- the maps are almost identical. My 8 year old son, John, has cancer- Acute Lymphoblastic Leukemia. Our cancer ward at Childrens Hospital of Pittsburgh is often so full that our cancer kids have to be placed on other floors. Please do not give any funding to build Nuclear Reactors. Is the production of electricity so important that our childrens lives must be sacrificed to obtain it. Contact me and arrange to come to the oncology clinic with me and watch my son getting a spinal tap with chemo, or if he should relapse- will anyone who votes for these funds come and stand beside me while I tell my son that he may die? It is too late for my home state- please do not spread this legacy of sorrow and suffering anywhere else in our nation. Sincerely, Lorraine Cotter 412 979-0059
