Division of Industrial and Medical Nuclear
Safety, NMSS
Washington, D.C. 20555

Dear Ms. Greene,

This is in response to your letters of April 6, 1993 requesting a more detailed description of the sources that we propose to make available under our exempt license, and your letter of July 15, 1993 reminding us that we have still not submitted the requested data. We regret the delay in responding to your request. We had experienced a number of delays in the preparation and printing of our new product catalog which we felt would provide definitive response to the issues raised by your office. The catalog was published on July 16, 1993, and it is included with this letter as enclosure (2) in support of our license renewal request. Enclosure (1) is a listing of the specific sources and source model numbers referenced in the catalog pages.

We wish to thank you for your patience as we prepared our new catalog and feel that it will provide a definitive description of the products that we make available for exempt distribution.

Sincerely,

Walter L. Milne
