QUALITATIVE ATTRIBUTES			Initials					
			a	b*	c#			
1.	The initial conditions are realistic, in that some equipment and/or instrumentation may be out of service, but it does not cue the operators into expected events.	<u>P</u>	<u>SB</u>	<u>RW</u>				
2.	The scenarios consist mostly of related events.	<u>P</u>	<u>SB</u>	<u>RW</u>				
3.	Each event description consists of . the point in the scenario when it is to be initiated . the malfunction(s) that are entered to initiate the event . the symptoms/cues that will be visible to the crew . the expected operator actions (by shift position) . the event termination point (if applicable)	<u>P</u>	<u>SB</u>	<u>RW</u>				
4.	No more than one non-mechanistic failure (e.g., pipe break) is incorporated into the scenario without a credible preceding incident such as a seismic event.	<u>P</u>	<u>SB</u>	<u>RW</u>				
5.	The events are valid with regard to physics and thermodynamics.	<u>P</u>	<u>SB</u>	<u>RW</u>				
6.	Sequencing and timing of events is reasonable, and allows the examination team to obtain complete evaluation results commensurate with the scenario objectives.	<u>P</u>	<u>SB</u>	<u>RW</u>				
7.	If time compression techniques are used, the scenario summary clearly so indicates. Operators have sufficient time to carry out expected activities without undue time constraints. Cues are given.	<u>P</u>	<u>SB</u>	<u>RW</u>				
8.	The simulator modeling is not altered.	<u>P</u>	<u>SB</u>	<u>RW</u>				
9.	The scenarios have been validated. Any open simulator performance deficiencies have been evaluated to ensure that functional fidelity is maintained while running the planned scenarios.	<u>P</u>	<u>SB</u>	<u>RW</u>				
10.	Every operator will be evaluated using at least one new or significantly modified scenario. All other scenarios have been altered in accordance with Section D.4 of ES-301.	<u>P</u>	<u>SB</u>	<u>RW</u>				
11.	All individual operator competencies can be evaluated, as verified using Form ES-301-6 (submit the form along with the simulator scenarios).	<u>P</u>	<u>SB</u>	<u>RW</u>				
12.	Each applicant will be significantly involved in the minimum number of transients and events specified on Form ES-301-5 (submit the form with the simulator scenarios).	<u>P</u>	<u>SB</u>	<u>RW</u>
