Based on my discussion with Jesse, these docs have been determined to be "Safeguards Info"--thus should be removed from public and main libraries. This info does not fall into the broader category of info (PIBs, etc.) we have been removing from the Web page and ADAMS, but which is NOT considered SGs Info.

Are these safeguards documents. If they are, we should remove them from both the public library and the main library. If not, they should only be removed from the public library, and remain in the main library profiled as sensitive and not publicly available.
