Subject: PT. BEACH FOIA

Ginny,

I will complete the Pt. Beach FOIA and get you a list of documents and their accession numbers sometime today.

However, it came to mind that the subject of this FOIA (security key card system at Pt. Beach) may not be appropriate at this time. I know that the NRC is currently reviewing all of our publicly available documents to see if they really are appropriate for public consumption (e.g. design details that could assist a person who wanted to do harm to a nuke plant, security information, ect.).

Should you/we run this by either management or our safeguards people to confirm that this type of FOIA should be answered during this heightened state of alert?

Thanks,
Beth
