Subject: Fwd: Guidance on Release of Information to the Public

Hi -

DE's only comment to the attached is that the staff needs to be sensitized to the criteria such that their publicly available documents do not release such information. This may not be readily achieved through a network announcement; therefore, it would be prudent to have it discussed at branch meetings to gain staff alignment. Also, the staff should sensitize the licensee of the criteria such that the licensee's presentation materials do not present major site-specific physical weaknesses; e.g. avoid phrases such as the failure of this component may lead to an increase in core damage frequency.

Please let me know if you have any questions.

Thanks,
Carol
