Subject: Requests for AE Inspection Based on Review of 50.54(f) Responses

Bob,

As discussed this past Monday you wanted us to give you a list of the regions' recommendations for an AE Team based on the review of the licensee response's to the 10 CFR 50.54(f) letter on adequacy and availability of design bases information. I would have sent it earlier, but I was holding out f

Region 1

Ginna, Beaver Valley, Nine Mile (Unit 2). Also, they also would like to make sure the Vermont Yankee still goes on.

Region 2

Brunswick, Hatch

Region 3

Davis-Besse, Fermi

Region 4

Cooper, Waterford, Wolf Creek

DISCLAIMER

I called the regional engineering leads to run these by them to make sure things hadn't changed..... However, I was not able to get a hold of the region 3 lead or get a response via E-mail, so that I would recommend you contacting someone there before you do too much leg work.
