Dear Col Mercier,

As discussed on the phone yesterday, attached are the comments from ORISE's review. I agree with the comments. Please review the attached comments. Let me know a couple of days next week that would be good and I will work with you and ORISE to set up a conference call to discuss.

Also, please be ready to discuss the question regarding the Ra-226 and why this radionuclide was not identified.

Please feel free to call at anytime if you do not understand a Comment.

Thank you  
Laurie Peluso
