Frank...can you drop off a copy of the NUREG to Margie Kotzalas (E corridor on 5th floor)...we will try to look at it ASAP in response to Walt's request.

Bill,

I am forwarding this screening request to you for your consideration/action. The document in question is maintained by the Operator Licensing Branch (Dave Trimble is Section Chief).

FYI, the document lists the knowledge & abilities for nuclear power plant operators including plant specific systems, characteristics, as well as normal, abnormal, and emergency operating procedures. These knowledge and ability elements are also prioritized in order of importance for safe operation of the plant and protection of the public health & safety.

CC: Margie Kotzalas
