Subject: NRR Comments - DSRM - COMSECY-01-0030 - Guidance to Staff on Release of Info to Public

Mindy,

In addition to Bill Reckley's comments (forwarded email), NRR has a comment on New Criterion 22. We suggest revising the last sentence to say:

"This does not include general conditions such as percent power, plant mode, or the reason for changes in plant status, and generally does not apply to information in event reports."

We have made this suggestion because we believe the guidance is unclear with regard to information contained in event reports and the "reason or comment" column in plant status reports.

Margie
