Subject: ? on sensitivity review

Bill, I am working on reducing the PDR document backlog today. I am unsure as to whether several documents should be withheld and I'd like your opinion.

Someone requested the NUREG "Evaluation of Potential Severe Accidents During Low Power and Shutdown Operations at Surry, Unit 1." Sam reviewed the NUREG and said it was ok to release because it didn't contain detailed information. Later, the PDR brought up for review the 10 appendices to the NUREG. These appendices do contain detailed information, like simplified P&IDs with pump and valve tag numbers and event trees. Basically, it gives all the details for the PRA calculations. I think the information in the appendices is sensitive. Am I right to request that the PDR withhold these documents?

Margie
