**Subject:** NUREG/CR Series on GSI-191

The NRR information review team has looked at NUREG/CR-6762, Volumes 1 thru 7 re: GSI-191 and offers the opinion that they may be released without restrictions. We did not identify material that would be of such clear and significant benefit to a terrorist in a potential attack to justify removal of the GSI related information from public disclosure. Please give me a call (Bill Reckley, x2429) if you have any questions.
