Subject: Re: Davis Besse Head Degradation Review Items

Jay...this is Margie.....I haven't checked to see if someone has already replied to your request, but I have reviewed those documents and they are ok for public release.

Greetings,

I am updating the Davis Besse Reactor Vessel Head Degradation web site and I need to post the following items as references:

Information Notice 2001-005: Through-Wall Circumferential Cracking of Reactor Pressure Vessel Head Control Rod Drive Mechanism Penetration Nozzles at Oconee Nuclear Station, Unit 3

Generic Letter 97-001: Boric Acid Corrosion of Carbon Steel Reactor Pressure Boundary Components in PWR Plants

Generic Letter 88-005: Boric Acid Corrosion of Carbon Steel Reactor Pressure Boundary Components in PWR Plants

All three files are attached in pdf format. I request a review of these items to get them up in support of Bulletin 2002-01.

Thank you for your time in this matter,
Jay Collins
