CHAIRMAN REC'D
03 AUG 25 AM 9:58

August 8, 2003

Honorable Nils J. Diaz
Chairman
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Diaz,

Please find enclosed 504 letters from concerned citizens in the New York Metropolitan Area calling for the closure of Indian Point's two nuclear reactors. We hope that you take the time to read the personal thoughts that were shared.

Riverkeeper, along with an increasing amount of families, communities, and government, business, civic and environmental leaders throughout the tri-state area, remains deeply concerned about the risk Indian Point poses to our region. As you know, Riverkeeper has not been, nor are we now, an anti-nuclear group as such, although we have taken Indian Point to task in the past for its fish kills and other detrimental cooling water impacts. However, a catastrophic release of radiation from IP, caused by a terrorist attack or nuclear accident, would likely devastate the Hudson River ecology and contaminate, perhaps permanently, the New York City/Westchester water supply – precisely the two resources we seek to protect.

Indian Point has become a risk to our region's residents, economy and environment. This is a risk we are not prepared to take.

With Indian Point shutdown, the ecological integrity of the Hudson will be more secure, as will our water supply and the twenty-million people who live within fifty miles of the plant.

Sincerely,

Alex Matthiessen
Hudson Riverkeeper
& Executive Director

To: Dr. Nils J. Diaz, Chairman
Nuclear Regulatory Commission (NRC)

Dear Dr. Diaz,

As you know, the Nuclear Control Institute and other experts on nuclear safety warned that an attack on Indian Point nuclear power plant could breach either of the two reactors or the fuel storage pool, causing lethal contamination of everything within 50 miles of the site. MY WHOLE FAMILY IS IN THIS AREA!

Further, the Witt report, commissioned by Governor Pataki, concludes that the current evacuation plan is completely unworkable.

Dr. Diaz, our safety and that of our children is at stake! I implore you to take immediate action on the decommissioning and closure of Indian Point.

Sincerely,

Metania Steiner

To: Dr. Nils J. Diaz, Chairman
Nuclear Regulatory Commission (NRC)

Dear Dr. Diaz,

As you know, the Nuclear Control Institute and other experts on nuclear safety warned that an attack on Indian Point nuclear power plant could breach either of the two reactors or the fuel storage pool, causing lethal contamination of everything within 50 miles of the site.

Further, the Witt report, commissioned by Governor Pataki, concludes that the current evacuation plan is completely unworkable.

Dr. Diaz, our safety and that of our children is at stake! I implore you to take immediate action on the decommissioning and closure of Indian Point.

Sincerely,

Dear Dr. Diaz,

As you know, your agency and independent nuclear safety experts alike have acknowledged that a successful attack on a plant like Indian Point could lead to a catastrophic release of radiation causing tens of thousands of acute and long-term cancer deaths as far away as 500 miles or more.

The NRC policy states that a nuclear power plant should not be able to operate without a workable emergency plan. Further, the Witt report, commissioned by Governor Pataki, concludes that the current evacuation plan is unworkable. Therefore, I move that the NRC withdraw Indian Point's operating permit immediately.

Dr. Diaz, our safety and that of our children is at stake! I implore you to take immediate action on the decommissioning and closure of Indian Point nuclear power plant.

Sincerely,

Dear Dr. Diaz,

As you know, the Nuclear Control Institute and other experts on nuclear safety warned that an attack on Indian Point nuclear power plant could breach either of the two reactors or the fuel storage pool, causing lethal contamination of everything within 50 miles of the site.

Further, the Witt report, commissioned by Governor Pataki, concludes that the current evacuation plan is completely unworkable.

Dr. Diaz, our safety and that of our children is at stake! I implore you to take immediate action on the decommissioning and closure of Indian Point.

CITY, STATE

To: Dr. Nils J. Diaz, Chairman
Nuclear Regulatory Commission (NRC)

Dear Dr. Diaz,

As you know, your agency and independent nuclear safety experts alike have acknowledged that a successful attack on a plant like Indian Point could lead to a catastrophic release of radiation causing tens of thousands of acute and long-term cancer deaths as far away as 500 miles or more.

The NRC policy states that a nuclear power plant should not be able to operate without a workable emergency plan. Further, the Witt report, commissioned by Governor Pataki, concludes that the current evacuation plan is unworkable. Therefore, I move that the NRC withdraw Indian Point's operating permit immediately.

Dr. Diaz, our safety and that of our children is at stake! I implore you to take immediate action on the decommissioning and closure of Indian Point nuclear power plant.

To: Dr. Nils J. Diaz, Chairman
Nuclear Regulatory Commission (NRC)

Dear Dr. Diaz,

As you know, your agency and independent nuclear safety experts alike have acknowledged that a successful attack on a plant like Indian Point could lead to a catastrophic release of radiation causing tens of thousands of acute and long-term cancer deaths as far away as 500 miles or more.

The NRC policy states that a nuclear power plant should not be able to operate without a workable emergency plan. Further, the Witt report, commissioned by Governor Pataki, concludes that the current evacuation plan is unworkable. Therefore, I move that the NRC withdraw Indian Point's operating permit immediately.

Dr. Diaz, our safety and that of our children is at stake! I implore you to take immediate action on the decommissioning and closure of Indian Point nuclear power plant.

Dear Dr. Diaz,

As you know, the Nuclear Control Institute and other experts on nuclear safety warned that an attack on Indian Point nuclear power plant could breach either of the two reactors or the fuel storage pool, causing lethal contamination of everything within 50 miles of the site.

Further, the Witt report, commissioned by Governor Pataki, concludes that the current evacuation plan is completely unworkable.

Dr. Diaz, our safety and that of our children is at stake! I implore you to take immediate action on the decommissioning and closure of Indian Point.

Sincerely,

To: Dr. Nils J. Diaz, Chairman
Nuclear Regulatory Commission (NRC)

Dear Dr. Diaz,

As you know, your agency and independent nuclear safety experts alike have acknowledged that a successful attack on a plant like Indian Point could lead to a catastrophic release of radiation causing tens of thousands of acute and long-term cancer deaths as far away as 500 miles or more.

The NRC policy states that a nuclear power plant should not be able to operate without a workable emergency plan. Further, the Witt report, commissioned by Governor Pataki, concludes that the current evacuation plan is unworkable. Therefore, I move that the NRC withdraw Indian Point's operating permit immediately.

Dr. Diaz, our safety and that of our children is at stake! I implore you to take immediate action on the decommissioning and closure of Indian Point nuclear power plant.

Dear Dr. Diaz,

As you know, your agency and independent nuclear safety experts alike have acknowledged that a successful attack on a plant like Indian Point could lead to a catastrophic release of radiation causing tens of thousands of acute and long-term cancer deaths as far away as 500 miles or more.

The NRC policy states that a nuclear power plant should not be able to operate without a workable emergency plan. Further, the Witt report, commissioned by Governor Pataki, concludes that the current evacuation plan is unworkable. Therefore, I move that the NRC withdraw Indian Point's operating permit immediately.

Dr. Diaz, our safety and that of our children is at stake! I implore you to take immediate action on the decommissioning and closure of Indian Point nuclear power plant.

Dear Dr. Diaz,

As you know, the Nuclear Control Institute and other experts on nuclear safety warned that an attack on Indian Point nuclear power plant could breach either of the two reactors or the fuel storage pool, causing lethal contamination of everything within 50 miles of the site.

Further, the Witt report, commissioned by Governor Pataki, concludes that the current evacuation plan is completely unworkable.

Dr. Diaz, our safety and that of our children is at stake! I implore you to take immediate action on the decommissioning and closure of Indian Point.

Sincerely,

Michael S. Pordes MD NY, NY

CITY, STATE

To: Dr. Nils J. Diaz, Chairman
Nuclear Regulatory Commission (NRC)

Dear Dr. Diaz,

As you know, your agency and independent nuclear safety experts alike have acknowledged that a successful attack on a plant like Indian Point could lead to a catastrophic release of radiation causing tens of thousands of acute and long-term cancer deaths as far away as 500 miles or more.

The NRC policy states that a nuclear power plant should not be able to operate without a workable emergency plan. Further, the Witt report, commissioned by Governor Pataki, concludes that the current evacuation plan is unworkable. Therefore, I move that the NRC withdraw Indian Point's operating permit immediately.

Dr. Diaz, our safety and that of our children is at stake! I implore you to take immediate action on the decommissioning and closure of Indian Point nuclear power plant.

Nuclear Regulatory Commission (NRC)

Dear Dr. Diaz,

As you know, the Nuclear Control Institute and other experts on nuclear safety warned that an attack on Indian Point nuclear power plant could breach either of the two reactors or the fuel storage pool, causing lethal contamination of everything within 50 miles of the site.

Further, the Witt report, commissioned by Governor Pataki, concludes that the current evacuation plan is completely unworkable.

Dr. Diaz, our safety and that of our children is at stake! I implore you to take immediate action on the decommissioning and closure of Indian Point.

Sincerely,

John Lewis Gualf

To: Dr. Nils J. Diaz, Chairman
Nuclear Regulatory Commission (NRC)

Dear Dr. Diaz,

As you know, your agency and independent nuclear safety experts alike have acknowledged that a successful attack on a plant like Indian Point could lead to a catastrophic release of radiation causing tens of thousands of acute and long-term cancer deaths as far away as 500 miles or more.

The NRC policy states that a nuclear power plant should not be able to operate without a workable emergency plan. Further, the Witt report, commissioned by Governor Pataki, concludes that the current evacuation plan is unworkable. Therefore, I move that the NRC withdraw Indian Point's operating permit immediately.

Dr. Diaz, our safety and that of our children is at stake! I implore you to take immediate action on the decommissioning and closure of Indian Point nuclear power plant.

Sincerely,

Frances Gruse Scott
