The information review team has reviewed the order, cover letter and addressee list and determined that they may be released (ADAMS and web site) without restrictions.

Attached are drafts of the cover letter, security order (without the safeguards information), and the addressee list for the orders to be issued May 7 to decommissioning plants. Similar documents were placed on the power reactor page for the previous round of security orders.

Please review the draft documents and tell me if they are suitable for publication on the NRC's public web site.

Thanks, Joe Donoghue
