

AFFIDAVIT FOR EMF-2310(P)

Framatome ANP issued a letter to the NRC on August 12, 2003 that transmitted topical report EMF-2310(P) Revision 1, "SRP Chapter 15 Non-LOCA Methodology for Pressurized Water Reactors," for review and approval. Since this report is considered to be proprietary by Framatome ANP, the letter was accompanied by an affidavit also dated August 12, 2003.

This affidavit sets forth five criteria for determining the proprietary nature of the referenced document, in this case EMF-2310. Framatome ANP has determined that the various proprietary statements made in EMF-2310, taken as a whole, meet all five of these criteria.
