Subject: Review of nrcweb:303 pages and other Web Material

pel.g

Paul,

Attached is a summary of the generic communications and NUREGs that I reviewed for sensitive information for you to include in a consolidated report. I included those items that I reviewed that I thought matched the criteria but because the material was general or that the hazzard/risk was low I recommended that it be left on the website.

I only recommended a few for removal .

Let me know if you want to discuss further.

Fritz
