 Subject: Design 50.54(f) response reviews

DRS Engineering staffers, NRR PDs, DRP BCs,

We have set up a meeting/conference call for tomorrow (Thursday 2/27) at 2:00 pm CST/3:00 pm EST in conference rooms A&B to discuss results and direction from the pilot effort on review of the licensees' 50.54(f) responses. The number and pass code for the call is 301-415-7605. For the pilot effort on 50.54(f) we utilized a representative from DRS, a representative from NRR, and one from the resident office. We are anticipating the same type effort for the remaining plants on a "best effort" basis and fully recognizing the many other activities in progress may make this result in a lesser product in some cases. Please attend the meeting/call or have a representative present. Copies of the Fermi pilot result may be obtained from Patricia Loughheed in RIII and Andy Kugler in NRR. The goal will be to conduct these reviews next week (wk of 3/3) such that the results can be discussed during the PPR meetings.

Please see Mark Ring, Patricia Loughheed in RIII, or Andy Kugler in NRR with any questions you may have. Thanks in advance for your cooperation.

-Mark
