MEMORANDUM TO: A. Randolph Blough, Director, DRP, RI  
Wayne D. Lanning, Director, DRS, RI  
Victor M. Mc Cree, Director, DRP, RII  
Charles A. Casto, Director, DRS, RII  
Steven A. Reynolds, Acting Director, DRP, RIII  
Cynthia D. Pederson, Director, DRS, RIII  
Arthur T. Howell III, Director, DRP, RIV  
Dwight Chamberlain, Director, DRS, RIV

FROM: Stuart A. Richards, Chief **/RA/**  
Inspection Program Branch  
Division of Inspection Program Management

SUBJECT: CHANGES TO TRAINING AND QUALIFICATION REQUIREMENTS  
FOR REACTOR ENGINEERING INSPECTORS

The purpose of this memorandum is to inform you of an immediate action I am authorizing to address a problem identified with Inspection Manual Chapter (IMC) 1245, Appendix C2, "Reactor Engineering Inspector Technical Proficiency Training and Qualification Journal." In addition to other requirements, individuals currently qualifying under IMC-1245, Appendix C2 must complete either R-200P, "Westinghouse Technology Course" (3 week course) or R-200B, "GE BWR Technology Course" (3 week course). The Inspection Program Branch has been informed that the two courses are no longer available from the Technical Training Center.

Effective immediately, individuals qualifying under IMC-1245, Appendix C2 are no longer required to complete either R-200B or R-200P. In lieu of the supervisor's signature, a reference to the ADAMS accession number of this memorandum (ML032690366) should be noted on the Proficiency Level Signature Card and Certification contained in Appendix C2 of IMC 1245. A conforming change will be incorporated into the next revision of IMC 1245.

If you have any questions about this change or IMC 1245 in general, contact James Andersen, Chief, Performance Assessment Section, at 301-415-3565 (Email: JWA).
