

References

Kathleen O'Donohue, Sr. Operations Engineer

References

- Two reference applications:
 - j development references
 - j exam question references

References

- Ensure references used for development are available to the reviewers (Facility and NRC)
- Itemize the information on form ES-401-5 or equivalent format ES-401, D.2.g

References

- Exam development references should be the latest revision available
- Document the revision used for development
- Ensure reference is complete

References

- The JPMs are open reference, unless the information is identified as memory.
- The scenarios are open reference
- The follow-up questions are open reference

References

Written Initial Examinations are considered
Closed Reference

Written Requalification Examinations are considered
Open Reference

References

- The written exam is expected to be closed reference.
- It is understood that there are some K/As best tested using supporting documentation

- j plant data book
- j certain, convoluted procedures
- j use of charts and graphs

References

- Written Initial Exam open reference use should be minimal
- Use of references for written exam questions **shall not** be direct look up
- References **shall not** answer additional exam questions ES-401, D.2.g
