Mabel, I just finished talking with Walt and Mindy's e-mail expresses the present process accurately for paper NUREGs. For web published NUREGs, we have agreed that we will start the review based on draft criteria to get a jump on the process but will not approve any for release until the final criteria are made available. Gil

Mabel, first of all, are you trying to make us look bad writing e-mails at 12:22 a.m.?

Second, regarding your question at hand, I have discussed the criteria with Gil and he and I are on the same wavelength. If the NUREG is totally benign, it can be sent out. If there is any question about the sensitivity of the material, the RES management team (or reviewers of the material), should withhold it until the Commission makes its decision.

>>> Mabel Lee 11/27/01 12:22AM >>>

what is the current process, including the criteria for this? Pls let Gil know since I am out of the office until the 3rd of dec.

Thanks

Cheryl, Does the NUREG discussed in the attachment belong, in some way, to your branch? Gil

Thanks.

>>> Cheryl Trottier 11/27/01 01:04PM >>>

NMSS prepared it I think. but, the answer is nothing is sensitive, however, it is outdated. Send the requester to Larry Camper.

Subject: Sensitive information in NUREG/CR-5849

Greetings,

As indicated in the attachment, the Web, Publishing, and Distribution Services Division (WPDSD) has received a request for a copy of NUREG/CR-5849, "Manual for Conducting Radiological Surveys in Support of License Termination," 1992. The requester is associated with the Nuclear Power Plants Research Institute in the Slovak Republic.

I am addressing this email to you because the designated agency contact for that NUREG was J. Malaro, RES, who appears to have left the agency since the report was originally published.

As you know, the Commission is currently reviewing the agency's printed and Web-based publications to identify those that reveal significant details about the security, safeguards, or potential vulnerabilities at licensed facilities. As a result, I would very much appreciate your cooperation in reviewing this document to ensure that it does not reveal any sensitive information and, therefore, can be released to the requester.

Many thanks,

Paula A. Garrity
Acting Section Chief
Technical Publications Section
OCIO/WPDSD/PSB
