Ed and Mabel —

Is the senior person mentioned in Mindy's attached email Gil Millman? He is away all week.

Can one of you send the request to Mindy that NUREG/CR-0442 be withdrawn?

Ann

Ann, in NMSS and NRR the office directors designated one or two managers/senior staff to approve any program office staff recommendation for certain documents to be withdrawn from public access. If RES designates such a person, and that person approves the request to withdraw the document, I would forward the request to remove the document to the ADAMS/CIO staff. They are also in charge of removal via NTIS, GPO, etc. The PDR staff will also remove the document from public access. Just let me know who the senior person designee is and we can forward the request.

Mindy —

Is there a procedure or pathway to remove a sensitive document from public availability?

RES has determined that NUREG/CR-0442 (1978) should be withdrawn from the PDR (see attached request). But should it not also be withdrawn from GPO, NTIS, and our DISTRIBUTION group? Is there a way to globally check other NRC web sites? I was not able to find the NUREG/CR in ADAMS.

Please let me know if there is a procedure for removing sensitive documents, or a central person or office who will check all methods of public availability.

Thanks!

Ann Beranek, RES
