No. I'll just capture the thought in my transmittal to OCIO.

Does this mean that Ann has to send a new email?

I would add two points to Ann's e-mail: 1) Ann should be considered part of the review team, and 2) The Division 8 guides recommended for reposting are those identified in the table, which comprises all Division 8 guides previously posted to the web.

The Division 8 regulatory guides that were on the NRC's public web site (see attached list) have been reviewed for sensitivity by Sheryl Burrows and Andrea Jones. This evaluation for sensitivity was based on the draft criteria and the draft guidance in the SRM of January 25, 2002, that disapprove the draft criteria; together these attached documents are considered to provide a basis for the sensitivity review.

All Division 8 regulatory guides are recommended for reposting on the NRC's public web site.

Please review this recommendation, and if you agree, please forward your recommendation to the Division Director of DSARE for approval. That approval should be forwarded by email to GCM, the RES/OCIO liaison.
