Subject: Request to Publish NUREG/CR-6758
Place: PUBS

Please publish the following NUREG/CR document in paper form:

NUREG/CR-6758 "Radionuclide-Chelating Agent Complexes in Low-Level Radioactive Decontamination Waste: Stability, Adsorption and Transport Potential"

This document has been reviewed based on Commission guidance (dated January 25, 2002) to the staff for developing final criteria for release of information to the public. Based on this sensitivity review, it has been determined that the content of NUREG/CR-6758 is benign and contains no sensitive information that can be misused by those with malevolent intentions toward NRC-regulated facilities and activities. The result of the review (attached) has been approved by Farouk Eltawila (D:DSARE), the cognizant RES Division Director.

Thanks,
Gil Millman

Radiation Protection, Environmental Risk, and Waste Management Branch

Re: Approval for publication of NUREG/CR-6758 "Radionuclide-Chelating Agent Complexes in Low-Level Radioactive Decontamination Waste: Stability, Adsorption and Transport Potential" (Pacific Northwest National Laboratories).

As project manager for the subject report, I reviewed the "camera ready" manuscript of NUREG/CR-6758 based on Commission guidance (dated January 25, 2002) to the staff for release of information to the public. Considering the Commission guidance, the content of NUREG/CR-6758 is benign and it contains no sensitive information that can be misused by those with malevolent intentions toward NRC-regulated facilities and activities.

Therefore I recommend publication of NUREG/CR-6758 and request that you transmit your concurrence via e-mail to the DSARE Division Director to approve and transmit approval via e-mail to the RES OCIO Liaison (Gil Millman).

Thank you,

Phillip Reed
